- Prompting techniques and applying AI to work.

NGUYEN MAI THAO VY

SEO Specialist

With over 2 years of practical experience in managing SEO projects, I view SEO not merely as an algorithm, but as the ability to understand user intent and guide them in the AI search era. My strengths lie in logical thinking, data analysis, and practical strategic planning. I focus not only on ranking websites at the top but also delve deeply into CRO to convert traffic into actual customers, directly contributing to the business's revenue growth goals.

CAREER OBJECTIVE

- In the next 1 to 2 years, I aim to master GEO techniques to adapt perfectly to the shift of AI search engines. Simultaneously, I want to perfect my CRO skill set to help projects achieve not only high traffic performance but also high ROI.
- In the long term, I aspire to become an SEO Manager capable of leading a team and building an overall strategy where SEO and CRO play a key role, helping businesses affirm their brand position and sustainably grow revenue in the digital market.

WORK EXPERIENCE

SEO EXECUTIVE

11/2023 - 04/2026

SEO EXECUTIVE GTV SEO CO., LTD Certificate: [Here](#)

- **Comprehensive SEO Strategy Planning:** Plan overall SEO strategies, analyze the market and competitors to build a long-term growth roadmap.
- **Entity Building:** Implement Entity Building (Social Stack, GG Stack, GMB optimization, Schema, etc.) to synchronize brand signals to verify E-E-A-T credibility and trust.
- **Technical Audits:** Conduct periodic technical website audits, thoroughly resolve crawlability and indexability issues. Coordinate closely with the DEV team to optimize Core Web Vitals and enhance user experience.
- **Content Planning:** Build Topical Maps and control content quality to ensure alignment with Search Intent, factual information, and high conversion value. Develop Offsite implementation plans contributing to increased domain trust and improved target keyword rankings.
- **GEO Optimization:** Apply GEO optimization techniques to increase citations from AI.
- **Data Analysis & CRO:** Use GA4 and Search Console to track performance and build visual reporting dashboards. Analyze user behavior to propose solutions for optimizing conversion rates.
- **Training & Project Management:** Directly manage progress, coordinate, and take responsibility for KPIs of assigned projects. Train personnel on practical SEO mindset, operational processes, and skills to apply new technologies to optimize work performance.
